

red

Reds, Corals & Pinks are warm, vibrant colours that create a sense of intimacy and strength. Ranging from soft shades of coral and pink to bold, aggressive reds, these are colours that should be used with care. The paler tones are cheerful colours that reflect light to warm or brighten cool or dark rooms.

&
light grey

Grey, which like black is a non-colour, is the true neutral, and thus risks being bland and uninteresting. However, when the right tone is selected, anywhere from charcoal or slate through to soft dove, grey can be an ideal backdrop, or accent in practically any colour scheme.

Please take the time to check an actual powder coated sample of the colour of your choice.
